## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 8-11 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 29-32 are, directed to the process of making or using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Process claims 29-34 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. Claims 34-75, not directed to the process of making or using the patentable product, would not have been rejoined and are now canceled.

### ***Allowable Subject Matter***

Claims 8-11 and 29-34 are allowed.

The following is an examiner's statement of reasons for allowance: The above claims are allowed, because the cited prior art references make no mention nor do they suggest the instant electrolytic capacitor comprising a valve acting metal, a solid electrolyte layer, wherein part of that layer is of a lamellar structure containing the instant sulfoquinone or anthroacenemonosulfonate anion. Therefore it wouldn't have been obvious at the time the invention was made to created the instantly claimed solid electrolyte capacitor comprising a valve acting metal, a dielectric film layer thereon, and one of the instantly claimed anions or practice the process of making the invention in view of any of the prior art references cited.
